

ACQUA SOURCE™

Your Complete Solution for **Prefabricated Swimming Pools**

The **fastest** and **most cost-effective**
way to build a swimming pool starts with
prefabricated wall panels!

We exclusively offer **heat-galvanized, coated steel panels on both sides**, supplied directly from the manufacturing plant, delivering unmatched quality, advanced technology and outstanding durability.

Discover the **ideal solution** for a modern, durable and aesthetically refined swimming pool, built with innovative PVC-coated panels that ensure **exceptional corrosion resistance** and **long-lasting protection**.

HEAT-GALVANIZED DOUBLE-SIDED COATED STEEL PANELS

THE COMPLETE SOLUTION

Experience the ultimate in relaxation with a private prefabricated swimming pool built using coated steel panels!

Superior Technology & Corrosion Resistance

Thanks to advanced coating technology, your pool is fully protected against corrosion, wear and demanding environmental conditions.

The PVC-coated panel provides up to **10 times greater corrosion resistance**, thanks to its unique composition.

Easy Installation

The prefabricated design enables fast and cost-effective installation without compromising quality.

Modern Design & Premium Aesthetics

Maximum architectural flexibility combined with contemporary design and premium finishes that enhance any outdoor space.

Reliability & High Performance

Exceptional structural stability, minimal maintenance requirements and superior hydrostatic performance.

Outstanding Waterproofing with PVC Liner

High-quality construction combined with a premium PVC liner guarantees reliable pool performance for decades. The PVC liner offers outstanding flexibility, complete waterproof protection and leak prevention while significantly reducing long-term maintenance costs.

Environmental Sustainability

Our PVC-coated panels are environmentally friendly, fully recyclable and comply with the highest environmental standards.

Contact us today! Get everything you need, from mechanical to electrical equipment, to create a swimming pool that combines innovation, cutting-edge technology, maximum durability and superior waterproof performance.
